Metro District Continues its Fence Replacement Program

Since 1981, more than 41 miles of cedar wood fences have served as the aesthetic backdrop along Highlands Ranch's landscaped parkways adjacent to residential properties. In 2007 the Highlands Ranch Metro District began its Parkway Fence Replacement Program to replace aging parkway fence over a 25-year period. A composite fence comprised of recycled plastic and reclaimed wood will last longer than its wood counterpart and allow for a savings of 65 percent in maintenance costs.

The Metro District will begin this summer's fence replacement project Sept. 21. A majority of the fence located on the west side of Quebec between Palomino Park and University Blvd., and a small section along University Blvd. at Crosspointe Dr., will be replaced. Potential lane and/or shoulder closures may occur with the construction.

More than four miles of fence have already been replaced since the program began. These areas include the north side of Dad Clark Dr., both sides of Highlands Ranch Pkwy. near Santa Fe Dr., and both sides of Venneford Ranch Rd. southwest of University Blvd. These areas have a renewed curb appeal that brings aesthetic value to the community.

For additional information about the Parkway Fence Replacement Program visit www.highlandsranch.org or contact the Metro District at 303-791-2710.

Founded in 1981 as the local government in Highlands Ranch, Colorado, the Metro District provides a variety of municipal services to this planned community of 90,000 people. Learn more about the Metro District at www.highlandsranch.org
